(Bob DiPiero/John Scott Sherrill)

We can talk and talk all night
If you want to that's all right
Till I've heard every word you've got to say
Go ahead and take your time
If you've got something on your mind
But it won't change the way I feel anyway

That's ancient history to me now
Something we don't have to talk about
You know I love you anyhow
That's ancient history

There's a tale you've got to tell
How you stumbled and then you fell
But I guess I knew that all along
And, my love, there's times when we
Are weaker than we'd like to be
And I could tell some stories of my own

That's ancient history to me now
Something we don't have to talk about
You know I love you anyhow
That's ancient history
