I did my time,  
I paid my price,  
For all these things I did.  
I lost my feet,  
You said your piece,  
I thought that that was it.

So while you sleep so peacefully,  
And all your sins are buried deep,  
While you're dreaming I'm outside,  
Digging up the ones I missed.

When's it coming back again?  
When's it coming back around again?  
I don't ever know.  
When's it coming back again?  
You can try all you want but,  
The past knows what your did.  
And I can't seem to get away from it.  
When's it coming back again?  
When's it coming back around, baby,  
Coming back around again?

I've been chewed up,  
I've been spit out,  
But never thought to quit.  
I've taken blows,  
And felt them all,  
But nothing close to this.

So when you sleep so peacefully,  
And all your sins are buried deep,  
While your dreaming I'm outside,  
Digging up the ones I missed.

When's it coming back again?  
When's it coming back around again?  
I don't ever know.  
When's it coming back again?  
You can try all you want but,

The past knows what your did.

And I can't seem to get away from it.  
When's it coming back again?  
When's it coming back around, baby,  
Coming back around again?

My backs against the wall,  
I'm feeling for the door  
But I can't find it,  
As the knife slides into me.  
And as I'm standing there,  
Oh, she walks in,  
And blurry fears are coming clear,  
And I can finally see.

When's it coming back again?  
When's it coming back around again?  
I don't ever know.  
When's it coming back again?  
You can try all you want but,  
The past knows what your did.  
And I can't seem to get away from it.  
When's it coming back again?  
When's it coming back around, baby,  
Coming back around again?

When's it coming back again,  
When's it coming back around again.  
When's it coming back.  
When's it coming back again.  
Ooooh.

And I can't seem to get away from it.  
When's it coming back again?  
When's it coming back around, baby,  
Coming back around,  
Coming back around, baby,  
Coming back around again?
