I'm a white flag waving  
When there's no fight left to win  
In the desert waiting  
For the tide to bring me in

When love goes nobody  
Wants to say it did.  
I realize, baby, there's no

[Chorus]  
No square one,  
Just the lines in the sand.  
No morning,  
Just the sun going down.  
From now on,  
I'm just a face in the crowd.

You're never gonna see again  
Never gonna get back baby

We were fading  
Trying a lot of flames  
That we put out  
We were landing,  
A plane that  
Never left the ground

We were looking for a sign  
That this ship was going down  
While we were treading water,  
Baby

Chorus

You're never gonna see it again  
Never gonna get back baby

No square one,  
Oh just a shape in the clouds  
No memories,  
Just a picture you found

From now on,  
I'm just a face in the crowd

You're never gonna see again  
We're never gonna get back baby

I need your love  
I need that (insert city) love  
Oh I need your love  
I can't give this up  
And oh I need your love

Chorus

You're never gonna see it again  
Never gonna get back  
Oh there's gonna be no warning  
Never gonna get back

Never gonna see it again  
Never gonna get back, yeah  
Never gonna get back this way

(Bari Sax Solo)

Oh and when I see you  
On the streets of (insert city)  
Well I wanna know you  
I wanna know who you are

And when I see you  
On the streets of (insert city)  
Well I wanna know you  
I wanna know who you are
