"Above Stairs"

Visit "[Above Stairs](#)" on MotoLyrics.com

We've got everything we want.
Feed me grapes, baby and I'll stuff them down my
throat.
We've got a lifetime of good memories and separate
bedrooms.

If I could live this life again,
I'd change everything
And if I could be me again I'd be different.

Now that I think about what I could start
If I started anything
And I think about what I could ruin
If I ruined anything.

And what did I lose and where did I lose it?
I've got nothing but fear and the hands in my pockets.
This can't be everything!

We get everything we need.
It has always been like that what else could we ask for?
We know everything about each other so we don't have
to talk anymore.
