How can they say there is one way
When it's the opposite?
And how can they know the end of the story
Before I tell it?
'Cause when I walk
Your feet they fall to the same beat
Or maybe we're from two different worlds, but we got
our own language

We talk to people but they never understand
They think we're crazy 'cause it sounds like laws

We're speaking in our native
Speaking in our native tongue
We're speaking in our native
Speaking in our native tongue

We used to live like we were strangers we didn't know
any better
We didn't fit in with the outer crowd so we gave in and
we shut our mouths
But oh how I love your history and I can take it
And when you talk in code to me I can translate it

We talk to people but they never understand
They think we're crazy 'cause it sounds like laws with
them
Ain't it strange all the things you hear when you sit and
listen?

We're speaking in our native
Speaking in our native tongue
We're speaking in our native
Speaking in our native tongue

And all this time I've been wasting my breath
Just wasting my woes on everyone else

Now they're speaking in my native
Speaking in my native tongue

So come on, talk it out
So come on, talk it out
So come on, and talk, talk, talk, talk, talk, talk it out
Your voice have brought me back me from the dead
So come on, talk, talk, talk, talk, talk, talk it out, out,
out, out

Speaking in my native
Speaking in my native tongue
We're speaking in our native
Speaking in our native tongue

You know I'm speaking the whole day
I've been wasting my breath
Just wasting my woes on everyone else

Speaking in my native
Speaking in my native tongue
