"I'm Sorry"

The empty street the lights are dim
But still the fog moves in
It takes me back it brings me home
To where it all began
I let you out, again
With the top back down and the sail up wind
Your out there again
Tell me how, can you tell me
Im sorry
Im sorry that this hurt you
Are you listening
You know I'll be
Right here for you
The silence here helps me wait
But only time can mend
Appreciate and celebrate
A life that never ends
I let you out, again
With the words you said there's now worry friend
Youre out there again
Don't let go cause I wont let go
