"Lorelie"

Visit "[Lorelie](#)" on MotoLyrics.com

Inoculate yourself it'll help with the sickness
Do what you can to populate the antidote
Find shelter don't forget to breathe
Welcome to a village in the tops of the trees
We lack love so we need your business
Do what you can to propagate the lottery
Get a job and pay your rent
Try to feed your babies with the money that's left

When the moon is out and the camp is cold
Keep the fire burning until the morning
When the lights are low keep your eyes
On the shadows of the floor of the forest below

When the moon is out and the camp is cold
Keep the fire burning until the morning
When the lights are low keep your eyes
On the shadows of the floor of the forest below

Fortify everything around you
Or be mortified when they surround you
And the only protection you have
Is the only protection they know how to penetrate

When the moon is out and the camp is cold
Keep the fire burning until the morning
When the lights are low keep your eyes
On the shadows of the floor of the forest below

When the moon is out and the camp is cold
Keep the fire burning until the morning
When the lights are low keep your eyes
On the shadows of the floor of the forest below
