

## Passenger "Used"

Visit "[Used](#)" on MotoLyrics.com

Your world always seemed so far away  
My words are bouncing against your shield  
They say time will heal all wounds  
But I can't bleed forever

I want to live  
I want to breathe  
I want to live forever

Please spare us your self-pity  
It's tedious enough  
The stack of empathy  
Has long ago run out

I hold no regrets of what has been done  
I don't need the memories of a haunted man  
It sickens me to feel this way  
But I can't bleed forever  
I want to live  
I want to breathe  
I want to live forever
