She knows your side, the side she knows it well  
Shes needing some time, it seems she's gone and fell  
All over you, again it's not the same.  
The way to look on through, shell be playing you game.

Chorus

Dododo...and she's wishing.  
And she's crying now  
Now she's hoping well

It seems that she knows where she's coming from  
Even still you go, you think it's far from done  
Shes having you now, you go running back  
Same old story how she's down and out..  
Shes perfecting her craft.
