And I'm the only one that stands
Between the mastermind and his new plan
The wind is blowing in my hair
And I'm staring at the end
And I've come too far
And I've come too far

Stumble around this broken, torn down town
This smoke has entered my throat
And I just cant stand this
The shadows seems to scream
But I can barely see
But I can barely see

I've come too far for this you see
To let you get away from me
I've come too far for this you see
To let you get away from me
So let me hit you with my best shot
I'm sure you'd like to hit me back sir
I've come too far for this you see

Hand over my mouth and I
Stagger up onto these feet
I'm running at full speed
And I can feel the heat,
I can feel the heat when I see
I will draw my weapon from my sheath

I've come too far for this you see
To let you get away from me
I've come too far for this you see
To let you get away from me
So let me hit you with my best shot
I'm sure you'd like to hit me back sir
I've come too far for this you see

I'll draw my weapon from my sheathe,
Hold you down until you cant breathe
Let you feel just how I felt
When the smoke had entered me

Let you feel just how I felt

I've come too far for this you see
To let you get away from me
I've come too far for this you see
To let you get away from me
So let me hit you with my best shot
I'm sure you'd like to hit me back sir
I've come too far for this you see

You set fire to everything I've got
Take your best shot
Take your best shot
