### "All Over Me"

Visit "[All Over Me](#)" on [MotoLyrics.com](https://MotoLyrics.com)

I can tell by the way that she's all over him  
She must be all over me  
And the tales I've been told I am finally believing  
I can't deny what I see  
This old barroom is full of suspected surprises  
Just like they said it would be  
And I can tell by the way that she's all over him  
She must be all over me

I guess I should have known by the way she's been  
acting  
This is just how it would be  
All I ever wanted was her love everlasting  
Looks like she wants to be free  
And I can tell by the way that she's all over him  
She must be all over me

I'm standing here and my heart goes to pieces  
Along with all of my dreams  
She's on the dance floor with her arms tied around him  
I wish they were wrapped around me

And I can tell by the way that she's all over him  
She must be all over me  
And the tales I've been told I am finally believing  
I can't deny what I see  
This old barroom is full of suspected surprises  
Just like they said it would be  
And I can tell by the way that she's all over him  
She must be all over me

She must be all over, it must be all over  
She must be all over me
