Precious flower in my hand
I wanted love always at my command
But in you saw a freedom light
That I could smother if I hold on tight

So say what you want
Do what you can
But save the best for me

You're my home you're my resting place
The shadow where I hide this face
You have opened up the freedom door
I know you well but I'm wanting more

So be who you are
Do what you will
But save the best for me

I feel your love washing over me
You're here with me
Healing water wash over me
You're here with me

So say what you want
And be who you are
Do what you will
But save the best for me
I'll save the best for you
