### "Driftin' By"

Visit "[Driftin' By](#)" on MotoLyrics.com

That same moon that we watched so many nights  
Still hangs in the August sky  
My rear view mirror is still slanted to the side  
From when I could look in it and see your eyes

Everything just keeps on driftin' by  
Like a tube on that river, you and I  
And the only thing that I can't clearly see  
Is why you left Texas and me

Every time that I play this old guitar  
I wish I was still playin' it for you  
I still can't think about that dusty hill country  
Without feelin' just a little blue

And I knew just lookin' at you my rear view would only  
show me  
The back of my seat in the days to come  
But these days just take forever, I can't believe this  
month is over  
And you just keep slippin' further away
