When the vapour of untempted fission  
Energizer the eternal invasion  
It spawns a chaotic violent mission  
We're all victim for his sensation

Masters that turn to slaves  
When the process conducts itself  
Buried by atoms in falling caves  
Neck high in radiation's delf

A step by step downfall  
As a result of our megalomania  
We aimed to make energy crawl  
But lost the fight to Urania

Like the occurring of tidal waves  
And volcanos furious fidelism  
Untuning ligocs' harmonious octaves  
To outshine every syllogism

That algorithm is now at work  
When a bullet cuts through the air  
Finding it's target through the mantle murk  
That plunders every lair

A step by step downfall  
As a result of our megalomania  
We aimed to make energy crawl  
But lost the fight to Urania
