Watching city lights from far away
The stars are shining in the sky
A little more to the next town
Then we get to sleep
On the window I see myself
Look all tired and empty
Here no one is lucky enough to live
Such an easy life

On the road
Some left but still some are here
On the road
Some change but some stay the same
On the road
I find this world just keeps changing
Just like you and me here,
I remained standing there

The people waiting there so we go there
Pack the stuff up in the vans
The life is simple we play a show and drive
To the next town
Only thing is to do the best
Every night and get fulfilled
Here no one is wealthy enough to waste
Precious time of a life

On the road
Some find but some get confused
On the road
Some face but some escape
On the road
I find this world just keeps changing
Just like you and me here,
I remained standing there

Without a word to share

On the road
Some left but still some are here
On the road

Some change but some stay the same
On the road
I find this world just keeps changing
Just like you and me here,

I remained standing there

On the road
Some find but some get confused
On the road
Some face but some escape
On the road
I find this world just keeps changing
Just like you and me here,
I remained standing there

Without a word to share
Without a word to share
