You know sometimes, I'm so far away from you darling
But Here is what I want you to do when I'm gone
You want to take my love with you, every way you go
You want to take my love, baby, every way you go,
darling
Take my love baby, every way you go
In the street, in the crawl, when you're home, all alone,
you wanna take my love with you, every way you go
When I'm gone, so far away, in your hart, I won't say
So baby, keep your mind on me, and will have a love,
and it's me
I know temptation turns around but you know I'll always
be around
You just gotta take my love with you, everyway you go
Come on baby,
Take my love with you, everyway you go
just look behind, dalring,
Take my love with you, everyway you go
Baby just take my love darling, everyway you go
In the street, in the crawl, when you're home, all alone,
you gonna take my love with you, every way you go
Oh yeah,
I know there's many other guys, oh they got their eyes
on you
Oh but you know baby, their intentions are'nt true
And if it's me that you desire,
oh we can make it darling through the far
You know you just gotta take my love with you, every
way you go
You wanna take my love baby, every way you go
Come on baby,
take my love with you, every way you go
You know you need it too darling
take my love baby, every way you go
In the street, in the crawl, you know when you're home,
when you're all alone
