[Paula]

Their always talking about the two of us
always saying that were breaking up,
always trying their best to tear us down.
They like to claim that we wont last too long
Were just going to go and prove them wrong
Giving up just aint what were about.

[Paula]

They try

[Frankie]

Try to become between us

[Paula]

They lie

[Frankie]

They never seem to leave us

[Paula]

Alone

[Frankie]

No one ever thought that we would make it this far

But were still keeping it together

Were good

And nobody breaking us apart

and no one ever could

Were always getting closer

were tight

None of their words to us dont matter

They can say what they like

Were doing it right

Baby were good

Were good

[x2]

[Frankie]

All they've got is all their jealousy

What we are is what they'll never be

What we know is we've got something strong

[Paula]

Nothing they can do can bring us down

Don't they know that we'll still be around

After all rumours have come and gone

[Paula]

They try

[Frankie]

Try to become between us

[Paula]

They lie

[Frankie]

They never seem to leave us

[Paula]

Alone

[Frankie]

But that dont really matter because we've made it this

far

But were still keeping it together

Were good

And nobody breaking us apart

and no one ever could

Were always getting closer

were tight

None of their words to us dont matter

They can say what they like

Were doing it right

Doing it right

All that we have is everything we need

I'll stand by you if you will stand by me

Wont listen to what they say

No Baby there aint no way

Nothing ever going to come in between us

Just you and me

But were still keeping it together

Were good

And nobody breaking us apart

and no one ever could

Were always getting closer

were tight

None of their words to us dont matter

They can say what they like

Were keeping it together

Were good

Dont matter x3

And no one ever could
