"Secret Missile"

Visit "[Secret Missile](#)" on MotoLyrics.com

I tell it sorrow that Europe is erased from
The world map within the nuclear explosions that
Still goes on at the remaining parts of Asia
Shows that millions of people will die world health
Organization is insufficient and the United Nations
Organization can't take the control to stop the war
Clouds of nuclear remnants and acid are still
Raining by that destroying forests and all living
Beings the human race is vanishing and the same
Is the world... god save us ... please...

There is no reason to live alive in this century
People dig each others graves peace disappears from
coast to coast
Traces of nuclear remain will lead the way to our racers
dissolution

Send in course to end it all
Locked to it's target secret missile
Send in course
Secret missile

No escape the crime's epidemic all will and with a big
explosion
Disarmed fakes everyone soon we will end up dead
Annihilated is the embryo pre-matural death of a week
existence
Technological shelter saver a few from this mess

[Chorus]

Becomes primitive and mentally moulded soon urged
by brutal instinct
Misanthropy end vengeance a cause by this war that've
been
If this beings have a change to live they'll live in
artificiality
The trenches are full with corpses cheated innocent
bodies lie

[Chorus]

Mangled organs in minefields the battle was to die
The vanishing of our planet, you may hear the cries
With those insatiabls leading us we won't die by our
wanted fate
Surreptitious suspicious plans destroyed my life in hate

[Chorus]

Warpain, explotions, suffer and death

I turned my face and looked back to mother earth in
sorrow
Said it was a mistake to start a war there'll be nothing
left tomorrow
There was no reason to live a life in this century
People dug eachothers graves now my souls in a fury

[Chorus]
