Embracing the wrong  
Weve waited too long  
My hands are reaching out  
And catch at a straw  
No hope, no harm  
But heavens to miss

There's more to life than  
Getting and having  
We tend to be complacent and cruel

Shes everything I need

Contentment took the place  
Where sadness had it's home  
Shes all I ever had  
Im begging for more  
I know she treats me right

Don't they say that time is a healer  
Things expected least become true

Shes everything I need

All the games you like to play  
Let me forget, lead me astray  
Now there is a place to be  
He reserved for you

Fill me with desire and  
Take me higher  
My souls on fire  
Fill me with desire

Shes everything I need

Fill me with desire  
Keep a tighter rein on me  
As you touch me tenderly
