"Hope And Victory"

Visit "[Hope And Victory](#)" on MotoLyrics.com

We can't stand here and stare when they take our land
away
And put it into a union, not for you and me
Where is it going to end, maybe in a civil war
We must stand in the frontlines for hope and victory

Chorus (2x):

They try to take our pride away
It's worth fighting for - Fighting for victory

... We will win

With our hearts full of fire and our hearts full of rage
We will fight for our honour and the workers rights
Rights to our speech, rights to our lives
In the country where I live, in the country that I love

Chorus (2x)

... We will win
