Face the face - got to the face the face

Face the face - got to the face the face.
you must have heard the cautionary tales

The danger's hidden on the cul-de-sac trails.
From wiser men who have been through it all

And the ghosts of failures spray-canned up on the Wall.

We got to judge the judge
we got to find the finds

We got to scheme the schemes
we got to line the lines.
We must stake the stakes
we got to show the shown

We got to take the takes
we got to know the known.
Try to place the place where we can face the face

Try to place the place where we can face the face.

Face the face - got to face the face

Face the face - got to face the face.
You must have tried and then defied belief

Maybe found futility in insular grief.
I need your hunger
you need mine

A million miles can swallow up time.

We got to fool the fools
we got to plan the plans

We got to rule the rules
we got to stand the stands.
We got to fight the fight
we must fall the falls

We got to light the light
we got to call the calls.
We must race the race so we can face the face

We must race the race so we can face the face.
Face the face - we got to face the face

We got to race the race - we got to -
Keep looking - New York
Chicago - London and Glasgow - keep lool

Keep on looking
keep on cooking
go to stay on this case

Study the pix
watch the flix
we got to find the face.
Face the face - got to face the face -
watch the flix - got to -
We got to judge the judge
we got to find the finds

We got to scheme the schemes
we got to line the lines.
We got to fight the fight
we got to fall the falls

We got to light the light
we got to call the calls.
'ky to place the place where we can face the face

Try to place the place where we can face the face.
?ky to place the place where we can face the face

We must place the place so we can face the face

We must place the place so we can face the face

We must place the place so we must face the race.
