(PSA)

Drugs

Widely used throughout society for a multitude of purposes,

Drugs have become part of our lives today.

There are drugs for physical ailments such as arthritis and back pain

There are drugs for mental illnesses such as depression and schizophrenia

Yet as of late many have turned to drugs for recreational use

There's something about this

That I can't resist

It's the one thing I think that I need

It's my own greatest weakness

Myself killing secret

I said when I'm dead I'll be free

(PSA)

Drugs fall into two main categories.

Drugs that are 'all natural' are found wild in nature  
In plants and minerals you encounter everyday

Drugs such as Mescaline, Psilocybin and THC

There are also drugs that are 'man made'

Drugs such as Oxycontin, Xanax, and Ritalin

But one of the most widely abused drugs today is  
Methamphetamines

(I crack under pressure

And lose all composure)

There's something about this

That I can't resist

It's the one thing I think that I need

It's a pain self inflicted

And why I'm addicted

I've said when I'm dead I'll be free

Won't go away

Won't go away

Won't go away

Go

Take this weight off of my mind

Trade for your life

Somethings may seem good

When all they do is lie

Pass it by

Stay away

At sometime inside you

You will find the strenght to get through
