Moon rises high  
Scared by its sight  
Hear your cry  
Stalk prey in the night

Lust of hunger inside  
Caught your feast for tonight  
Claws cut flesh open wide  
As you take the first bite

Running from hunters that try to kill you  
From killing their daughters so unbelievably true  
They crack you down and shoot you with lead

It's not good enough I'm still not dead

You run through the night like a savage  
Killing everyone in your sight  
Your rip their hearts from their body  
To revive the power in this night

You come across your father  
He holds a gun to your head  
He wipes a tear from his eye  
He fires the shot your dead
