I'll try to make the sunshine  
Brighter for you  
Now we're leaving beautiful  
There's a tear in your eyes

After all is said  
After all is done  
I'll do anything for you  
Come with me  
Close your eyes  
Hold my hands and feel alright  
Don't be scared  
Don't be shy  
Lift your head  
It's gonna be alright

I'll try to make the star shine  
Brighter for you  
And I'll take you in the shoulder  
Holding you way up high  
I even chase the rainbow  
Handed it in the sky

After all is said  
After all is done  
I'll do anything for you  
Come with me  
Close your eyes  
Hold my hands  
It'll be alright  
Don't be scared  
Don't be shy  
Lift your head  
It's gonna be alright

Through the eyes of innocence  
You will find  
You will see  
They'll come in time all make sense  
And you won't know  
That it will show inside  
Deep inside

Come with me  
Close your eyes  
Hold my hands  
It'll be alright  
Don't be scared  
Don't be shy  
Lift your head  
It's gonna be alright

I'll try to make the days last longer for you  
From the daybreak to the sunset to the end of time  
I'll keep you safe away from the hurting

Cause when all is said  
When all is done  
I'll do anything for you  
Come with me  
Close your eyes  
Hold my hands  
It'll be alright  
Don't be scared  
Don't be shy  
Lift your head  
It's gonna be alright

Come with me  
Close your eyes  
Hold my hands  
It'll be alright  
Don't be scared  
Don't be shy  
Lift your head  
It's gonna be alright
