I heard a cold advice: pick on someone your own size  
And that leaves you, and rules out me.. 'Coz it's a kick  
in the head

Hey, everybody said, I didn't turn the other cheek  
You think I'm weird. How weird are you?

Do you get tired when people stare?? Hey, I know, I  
do...

It's the way life is right now - I get up at dawn; I fall  
down at night

It's the way life is right now - I hope that noone sees my  
frightened smile

I fly around like a bee and everything you do - I see  
Yeah, I see you when you're weak - but with my head on  
my spine

I go to yours and you go to mine - the world's rocking  
under my feet

As though the present's never here

Hey, hey.. It's always last week and it's always next  
year

It's the way life is right now - I get up at dawn; I fall  
down at night

It's the way life is right now - I hope that noone sees my  
frightened smile

It's hard to do - too hard to take - I'm pretty scared and  
very wide awake

I see the road, not the turns ahead - so I say...

It's the way life is right now - I get up at dawn; I fall  
down at night

It's the way life is right now - I hope that noone sees my  
frightened smile

It's the way life is right now and I'm seeing things in a  
different light

What if tomorrow wasn't there - never a next week

Never just another year - Yeah, like time just disappear

It's the way life is right now..... I heard a cold  
advice:

Pick on someone your own size and that leaves you and  
rules out me..
