Rich & free, and a life beyond worries  
Time like words can be wasted too much  
Tried to cut his own wrist with an electric razor  
It's a disease no doctor will touch  
Maybe it's now or forever, now or forever  
See that's how when you point your finger  
That everytime that you throw dirt, you lose a little  
ground  
What not to do & how not to do it  
Back when being wild, still meant drinking beers  
It's written on the back of his shirt: He don't have to  
work!  
You can call him all day - But he just won't hear...  
Maybe it's now or forever, now or forever  
See that's how when you point your finger  
If later is never, then now is forever, now or forever  
Every time you throw dirt, you lose a little ground  
Now or forever, I know I'm not wiser & I'm not better  
But why do you point your finger  
Everytime you throw dirt, you lose a little ground  
Now or forever, now or forever  
See that's how when you point your finger  
That everytime that you throw dirt, you lose a little  
ground
