A long time ago they were building this land  
All that is left is just ruins and sand  
But now we are here, stronger than ever  
To pick up the heritage from our past

Like thunder and lightning from gathering clouds  
We're striking your heart like an arrow  
We're troops on the rise in this world of deception  
Deadly and proud we are carrying our flag

[Bridge:]  
We're standing tall, all for one, one for all  
Let the sound of steel be heard

[Chorus:]  
We're aware of our mission, we're spreading the call  
It's time for the mankind to see  
Let the power embrace you and you'll never fall  
Receive it and set yourself free  
Just receive it and set yourself free

Blow the dust of the old swords and join us today  
Hail to the ancient that showed us the way  
Now it is time for the truth to be told  
Reveal all the secrets from legends of old

[Bridge]  
[Bridge (sung by background vocalists)]  
[Chorus]

Battle cries they echo in the night  
As we march towards our victory  
The worlds will be crumbling  
The walls will be tumbling  
'Cause we are the ones, we proclaim back our land

[Chorus]
