Were coming out straight from 4026 get your gears
done and clear out the streets ain't no holding back
cause this pack is loaded here to represent LAGUNA's
pride no muthafucker you can never hide the beatdown
wont stop it's all up inside busting like a renegade, full
blast as one time is fast ticking gotta get things done.
never say die diy till I fucking die never say die dms till
I fucking die never say die hardcore till I fucking die
never say die laguna crew till I fucking die years have
come and still we stand united tough times, hardtimes
we will never be divided because what we got you can
never compromise what keeps us strong as concrete
burns in our eyes we breathe to live and we fucking live
to believe in ourselves and in what we hold on true
knowing the game and keeping it real... I am what I am
and this is what I say to you...
