B to Y to E to me  
Bye to me  
Gazed into the finest eyes  
Falling into your friendly fire  
Holding on to something that ain't real  
But you have jumped into the cracks  
Some unfortunate girl you put on wax  
I can't believe I never knew the deal  
Oh our time was made to flow  
Damn I tried but you had to go  
Now all your crazy mess has set you free  
If you could come within a mile  
Of showing this world a legitimate smile  
Then all this pain would never have to be.  
Did everything to make it work  
Did everything but?  
Did everything to make it right  
635  
Bye to me  
I've seen things like this before  
A man who don't know to walk out the door  
When all this time he knew there was nothing there.  
Walk outside. She's left behind  
Another freak she's bound to find  
Maybe this time he'll know just what to do
