"The Watchmaker And The Universe Maker"

Visit "[The Watchmaker And The Universe Maker](#)" on MotoLyrics.com

I see the infinite sunlight
Shining in my room through the skylight
I think to myself, who made the warm sun?

I see the leaves on the oak trees
Lookin out through the drive-through wendys
I think to myself, Â Who created the seeds?

It just doesn't make any sense to me
How this was all made so perfectly
Does it make sense to you?

Who created this universe from nothing?
There just has to be something
There just has to be something good

Like this song, it didn't just make itself

Just like a watch that has a watchmaker,
This universe has a universe maker, and Â he's called
God
Yeah, he's called God

You and me didn't come from monkeys,
Only monkeys come from monkeys, I know that's a fact.

The cells in our bodies didn't come out of slime,
because we know that slimeÂ
Well, it Doesn't make anything, it just stays slime, And I
know that's a fact

It's also a fact that we came from something, not not
monkeys, or sludgeballs, or infinite nothing,

Cause God made us all, and I know that's a fact.Â Â Â
