Turn on the blue, what do I see?
A bunch of hateful people talking to me
The crap they say's been heard before
And that's what started up the 2nd World War!

So many people see what's going on
Heads should be lifted

Keep your eyes on the twisted
We've seen it all before
Little minds can't be shifted
Watch out they're back for more

They call it pride to wave the flag
Shaving the hair off of their brainless heads
I think the world has seen enough
There's too much talking now it's time to get tough

Too many people see what's going on
Heads should be lifted

Keep your eyes on the twisted
We've seen it all before
Little minds can't be shifted
Watch out they're back for more

Hey twisted - what's in your head - so twisted
Hey twisted - go clear your mind - you're misled

Steps should be taken to stop what they're makin
Heads should be lifted... to see what's going on

They spread their mental disease
Ignorance needs a leader to make their mass increase

So keep your eyes on the twisted..
