What goes on in your mind  
Don't say I'm the jealous kind  
Think of all the promises we made now  
You might find another girl  
Living in your different world  
Hoping that your memory won't fade now  
What you gonna do when the miles are growing  
And you can't get with me  
What you gonna do without me knowing  
Please baby please

Chorus:

Don't forget to remember  
When you leave my side  
I'll be thinking of you  
Don't forget to remember  
Every day and night  
I'll be dreaming of you  
I will be thinking of you  
I will be dreaming of you  
Got a love built to last  
It's the future not the past  
Giving me these doubts inside my mind now  
Though I know the way I feel  
Is one hundred percent real  
I wonder can you stand the test of time now  
What you gonna do when the smiles are flowing  
And you can't get with me  
What you gonna do without me knowing  
Please baby please

(Chorus)

I'm giving in to such a strange sensation  
Missing you so tenderly (yeah I'm missing you)  
What's needed here is all your good vibrations  
Please baby please baby come back to me

(Chorus x3)

I will be thinking of you  
I will be dreaming of you
