Mm hm da da da da da da da  
When I met you  
I really didn't like you  
First impression was that you were somebody who  
Walked right by when I waved at you and say 'Hi'  
But they say  
Bad beginnings make happy endings  
And now that I know you I begin to understand things  
Turn around a hundred and eighty degrees  
I found my missing piece

There something 'bout you  
That's like the sun  
You warm up my heart, when I come undone  
You're like my soul mate  
And on those days,  
When I hurt  
When I break  
Mhm  
You are my band aid You are, you are  
When I hurt  
When I break  
You are You are, you are  
When I hurt  
When I break  
You are

When I get caught in the rain  
And it feels like  
There is no one in the world who understands my  
Complications that I face everyday  
As I talk it through with you  
No matter how I try to hide  
Just see straight from my disguise  
You know how to fix me  
You are my therapy  
Baby oh

There something 'bout you  
That's like the sun  
You warm up my heart when I come undone

You like my soul mate  
And all those things  
When I hurt  
When I break  
Mhm  
You are my band aid You are, you are  
When I hurt  
When I break

You are You are, you are  
When I hurt  
When I break  
You are

Isn't it funny how these things get turned around?  
Just when I thought I knew you  
You prove me wrong  
I used to hate the things you love  
And love the things you hate

And now I like it  
I like it  
I like it  
Now I la la la like it  
I like it  
I like it  
Now I la la la like it  
I like it  
I like it

There something 'bout you  
That's like the sun  
You warm up my heart when I come undone  
You like my soul mate  
And all those things  
When I hurt  
When I break  
Mhm  
You are my band aid You are, you are  
When I hurt  
When I break  
You are You are, you are  
When I hurt  
When I break  
You are

And now I like it  
I like it  
I like it  
Now I la la la like it  
I like it

I like it  
Now I la la la like it  
I like it  
Lalalalalala I like it  
I lalala like it
