My heart can't wait and see
End it now
Kick the bass!

Our secret love is only hurting me
It won't last forever
It wasn't meant to be
You must choose between us
Set one of us free
End it now
My heart can't wait and see

Our secret love is only hurting me
It won't last forever
It wasn't meant to be
You must choose between us
Set one of us free
End it now
My heart can't wait and see

This has been going on too long
Meeting behind his back is wrong
Do you really enjoy this game
You said you loved me and that was so lame

Our secret love is only hurting me
It won't last forever
It wasn't meant to be
You must choose between us
Set one of us free
End it now
My heart can't wait and see
