

Places To Park "Ascension"

Visit "[Ascension](#)" on MotoLyrics.com

The distance seems much further than the space
between
It turns out that it's all within this short arm reach
It was just waiting for the time, it was just waiting for
this time

And I know all that it takes is just one step more
I can see it clearly right in front of me
I'll step forward, reach out and take control

My blurry vision has cleared into focus now
I can see right through all these faded lies
It was just waiting for the time, it was just waiting for
this time
