What you say is what you get, keeps repeating through
your head

This has now become your life, turned away from
advice

Tired it tells, shame I noticed

You feel fine but you're losing focus, losing focus

This song is for you

Because you work so hard

When the day is done, we'll have some fun

This song is for you

You sacrifice and push aside, take adversity in stride

On the mark every time, givin' 'er hell, ain't no crime

Doing well, now I noticed

Strength of mind, you stay focused, you stay focused

This song is for you

Because you work so hard

When the day is done, we'll have some fun

This song is for you

This song is for you...
