"Remeber To Forget"

Visit "[Remeber To Forget](#)" on MotoLyrics.com

oh oh, remember to forget you
oh oh, remember to forget you
oh oh, remember to forget you

Sometimes I really really miss you
And when I really really start to
I stop myself from doing
Something that I might regret
Like picking up the phone to call you
Like hanging out and dreaming of you
Like thinking back to the very first moment we met

Then it comes like a flash
That's when I hide

I remember to forget your name
As you play your games with someone else
I've got a lot of things to do with someone who
Loves me better, better than you
Not the same constant change around the rules
Since there's nothing left to second guess
I remember to forget

Some days it's very very easy
To feel like you and I were really
So meant to be together
So meant to try love again
When will I ever meet another?
Am I always gonna wonder?
'Bout what you're doing, where you are
And if my heart will mend?
Then it comes like a flash
That when I hide

I remember to forget your name
As you play your games on someone else (No ohh)
I got a lot of things to do with someone who
Loves me better, better than you (Ohh yeah)
Not the same 'cause you changed around the rules
Since there's nothing left to second guess (No ohhh)
I remember to forget

oh oh, remember to forget you
oh oh, remember to forget
oh oh, remember to forget you
Ohhhhh.....

I remember to forget
Your name when you play your games
On someone else
I got a lot of things to do with someone who
Loves me better
Better than you

Then it comes like a flash
That's when I hide

I remember to forget your name
As you play your games on someone else (No ohh)
I got a lot of things to do with someone who
Loves me better, better than you (Ohh no no)
Not the same 'cause you changed around the rules
Since there's nothing left to second guess (Ohhhhh)
I remember to forget

I remember to forget your name
As you play your games on someone else
I got a lot of things to do with someone who
Loves me better, better than you (Ohh yeah)
Not the same 'cause you changed around the rules
Since there's nothing left to second guess
I remember to forget

Ohhhhhhhh
I remember to forget (Oh yeah)
I remember to forget
Your name when you play your games
On someone else
I remember to forget
I remember to forget
