If I knew just what to say  
I would make it go away  
All this pain inside  
I don't wanna fight

I refuse to say goodbye  
It's because I'm much too proud  
To apologize  
When I know you're right

And there's so much I  
Should have told you that I was afraid  
Come to me, let me show you

(Chorus)

Cause now I have to let you know  
I don't wanna lose your love  
It's to live and to die for  
I don't have a doubt I'm sure  
I've never felt this way before  
I could live and die for your love

I said the things I did to see  
If you would walk away from me  
My insecurity  
Drives you away from me

I don't ever wanna break it  
I think it's worth the while to save it  
I can make it right  
Or baby let me try

And there's so much I  
Should have told you that I was afraid  
Come to me, let me show you

(Chorus)

Cause now I have to let you know  
I don't wanna lose your love

It's to live and to die for  
I don't have a doubt I'm sure  
I've never felt this way before  
I could live and die for your love

No, no, no  
I'll never let you know  
Don't you know  
I really need you so

No, no, no, no  
If I wouldn't love you  
Then why would I constantly  
Say I do

Chorus

Cause now I have to let you know  
I don't wanna lose your love  
It's to live and to die for  
I don't have a doubt I'm sure  
I've never felt this way before  
I could live and die for your love

Cause now I have to let you know  
I don't wanna lose your love  
It's to live and to die for  
I don't have a doubt I'm sure  
I've never felt this way before  
I could live and die for your love
