Don't you hate the things that you say
The emotion that you feel turns out the wrong way
Don't you wish a smile was just a smile
And a word just a word
Not a personal desire

You know the reason I came here
It was for you
You know the reason I made it through
Was for you! You
Lover Number One

Aren't you tired of the common told lies
That entail after lets be friends for a while
Aren't you sick of excuses being fed
To avoid important questions
Breeding in my head

Oh something inside me
Says you are right
Says you're right

You know the reason I came here
It was for you
You know the reason I made it through
Was for you! You
Lover Number One

Oh something inside me
Says you are right
Says you're right

You know the reason I came here
It was for you
You know the reason I made it through
Was for you! You
Lover Number One
