We know that the system tries to hold us back
The stormtroopers of today are ready to attack
And we will show this world of survival
Those with strength will have no rival

We're waiting for the new dawn
We're waiting for the new dawn

Our time will come, when the dark turns to light
And the people stand united, ready for the fight
Then we'll show no mercy to the zionist enemy
A racial holy war, to set the white race free

We're waiting for the new dawn
We're waiting for the new dawn

We're waiting for the new dawn
We're waiting for the new dawn

We know that the system tries to hold us back
The stormtroopers of today are ready to attack
White men load your guns; the new dawn is near
We're marching under the swastika, till the victory is
here

We're waiting for the new dawn
We're waiting for the new dawn

We're waiting for the new dawn
We're waiting for the new dawn
