The night pierces in your eyes  
This reality touches your soul  
Desires and fears cover your heart  
Those dreams that keep you alive

The beauty is so fragile  
So little the beautiful  
Just a dream hidden  
Under death's cloak

..... Life is a moment into death ...

Chorus :  
We're just errant souls  
Lonely and painful  
Is our wandering  
Along this cold world

Eternity keeps you awake  
Only illusions give you life  
Just shining spheres  
Into our dark spectre

Immerse in a sea of lies  
False image is what you are  
A point in this black infinity  
Forgotten creature in the land of emptyness

Chorus
