"The Enemy"

Visit "[The Enemy](#)" on MotoLyrics.com

they talk behind your back and they say this and that,
nobody wants to hear this stuff, oh no
so be strong and don't let no one bring you down, just
be strong

the enemy will hurt your heart, the enemy will
make you be sorry, and feel guilty for things you never
did, so just ignore the enemies

anyone can say things to betray anybody, so didn't
listen to anything, unless you know what their talking
about, ooo , hey yeah

the enemy will hurt your heart, the enemy will make you
be sorry, and feel guilty for things you never did, so
just ignore all of the enemies
take time to think about what you gotta say before you
say it, take time to breathe before you get up and go
again

the enemy will hurt your heart, the enemy will
make you be sorry, and feel guilty for things you never
did, so just ignore every single enemy (repeat 2x)
