Your mission so simple, a blueprinted plan,  
Your eyes knows the story, you where you stand, oh  
baby (oh baby)  
You said you have answers and that you would show  
me,  
Your brilliance resebeles how you control me, now lady,  
Thought that you made me,  
Kisses layed out in a line from the past,  
Only the strongest survives the after-math, so shady,  
Never gonna play me,

[Course]

Your eyes burn, guess you never gonna lern, (no no no)  
Your eyes burn, I guess you never gonna lern, (you  
can't control me)

Born with the kind our lives on a quest,  
Strait to the chaseben school by them bells,  
Now baby, you look a little afraid babe,  
Silens has the potential, a knife at the heart,  
Wisdom is a tool, to see it from the start,  
Who made this? just an old lady,  
I opened up my arms and allowed you to hold me,  
I hope you saw the lies in all that you told me,  
But you never meant god would follow me,

Your eyes burn, guess you never gonna lern, (no no no)  
Your eyes burn, I guess you never gonna lern, (you  
can't control me) (x2)

Oh baby, now lady, thought they made me, look a little  
afraid babe,  
Just an old lady, try not to play me, one to choose

(One to choose) (x3)

(Course)

You can't control me (x12)
