Find it, I'll twist your head till you find it
I'll break your bones till you've got it
Can't take it no more, take it no more find it
Find it, insanity
Roll it, and come with me

10000 tons of shit
That explains what I feel inside my head
Laid down all day I pee and shit over myself
Sunday is here to stay

I hide behind that thing beyond

Prayers to all the Saints may bring me some strenght
If I suck my lithium I someday may laugh
Death will not set you free like they say
Grab on to something you can believe in

I hide behind that thing beyond

Find it, I'll twist your head till you find it
I'll break your bones till you've got it
Can't take it no more, take it no more find it
Find it, insanity
Roll it, and come with me

I hide behind
