

Portugal. The Man "Oceanic Exploration"

Visit "[Oceanic Exploration](#)" on MotoLyrics.com

Exploration
Of the deep cold ocean
Information
It's an age-old notion

Two thirds of the planet's underneath the salty sea
Getting down below the water
It ain't easy don't you see?

There's the pressure
Course there's no light or air
?
It must be very cold down there

So get yourself some scuba or a diving suit or bell
Hop in a submersibel and you can see quite well

Ocean exploration - it ain't easy don't you see?

Ocean creatures
And the dark ? floor
Creepy features
Starting legends, myths and lore

Two thirds of the earth is hidden by the brimy seas
With the right equipment we'll explore the ocean's
mysteries
