There's girls I've been in love with I smoked pot with  
I've met enough things in life  
I need this woman to get stuck with  
Scuff with I need it for my rude character  
And my cold temperature  
It's the main topic might marry her  
In mind she's with me shy smile made her pretty  
We took boat trips around the city  
I told her how this world became evil and disputed  
polluted  
Buildings and monuments just sooped  
It we talked about a livin' I'm still missing but I pray for  
Wanna buy her stuff that she adored but I was raised  
poor  
Covered my sorrow praise them for a better day  
tomorrow  
Cause all I have I borrowed bought myself lotto's  
Live on a hustle exploiting talents is my motto  
Produce half my world for money and more to follow  
My sins will be committed on a female body and  
If I die it's between legs police claiming pussy got me

Fly cocktail about a fly female  
Explain what I feel without further details  
We had future plans but she wasn't keepin' it real  
She broke my damn heart that's the deal, that's why

Love left me with a hangover  
Fly cocktail I will get over you yes  
You don't treat me right  
Still Jah is my guide on this road to life

I gave her lots of lovin' but she returned me nothing  
She couldn't give me no respect she's flexin' with a lot  
of men  
I finally left her in the cold took back my heart she stole  
Cause when I called her on the phone she often put me  
on a hold  
No baby no this is not my steelo  
I see so many eyes spy when I mingle with my people  
Dwell single that's the sequel  
When we was real you gave support

Now you act like you are bored gave your girls your  
home rapport  
From my next to my ex from my ex back to the next  
Maybe I did it for the sex maybe I did it to relax  
You will never know that's right I keep it to myself  
I know you dying inside holding my pillow tight  
You was my new flavor couldn't give I never gave ya  
Never played ya  
Can't understand this strange behavior no longer date  
ya  
We've grown up we splitted up I reminisce about you  
While refilling my cup

Fly cocktail about a fly female  
Explain what I feel without further details  
We had future plans but she wasn't keepin' it real  
She broke my damn heart that's the deal, that's why

You used me abused me  
Mentally confused me  
Lord no longer will you fool me  
Oh no  
I thought you was my guided light  
Fly cocktail you don't treat me right

(chorus)

I heard from him and him say me that she said she was  
pregnant  
It's been a long time since I stinged her like a cactus  
Put on the spot for what I did not  
Messed my thoughts claimed support it's not my fault  
To make a long story short  
She had a miscarriage a broken streetmarriage  
Her daddy kicked her in the belly  
Caused a lot of damage  
So now she's worried about them one night stands  
She didn't plan  
She never had a man until she had a Postman.

(chorus)
