Chorus

The vibes the trends the instant footage
If you afraid to draw the cards, we'll pull it
Shades in the dark, an invasion mark
From the heart is the only way to talk
How do you love
From times you was down and cold
On the floor there for you was bound to fall
No control
Standing with your back against the wall
Cause life will treat you cold

If you really really love it you might run them things
You will survive, rise above evil eyes
While suffering
Other then those who oppose innocent
Died in the mindstate
Wait till the beats come
Fill it in realer than the streetlaws I was raised by
And it made I, the river never stayed dry
Delivering post on the musical level I wrote
Quote from a devil toad metal in a puttle of blood
With the boat I travel carry heavy load
I was told, I was mould by the thought there was more
If there is diamonds don't give me emeralds
Music sounds violent then call the generals

Chorus

Hard for given what was driven through the veins
For easing up the pain
For bursting back the flames
When thoughts drain
To reclaim it's aim
For the some old cat who keep hollering the name
Without the meaning it will never be the same
But the terminology got some not knowing how to act
up in the game
Switching like a bitch, you are holding on to fame
Slipping and now you are sliding in the next man's lane.

Do you realize that all that glitters isn't gold
Is it really satisfaction, does it please your soul.
How do you love

Chorus

Have you ever took one second in your miserable life
Thought about the reason you live it ain't right
You remind me of that old grimy ass not capable
Not worth playing on the radio
You can not hate me though
I was born confused, born to produce, born without
norms
Straight crazy let my mind loose
It's a matter of several creditable vegetables
Everything we do is not compatible
If you can't understand then read the manual.
Documents first album gold as scheduled.
Fronting on a level not measurable
Credible ain't a word no more
Your world is in war
Come on.
