Little words have so much meaning
When you mean the words you say
Little words like glad to see you
How are you, hello good day
Little words that make you welcome
Little words that say goodbye
Little words that help you laughing
Little words that make you cry

There are words for all occasions
Words for all you say and do
But the gretest words of all Are
I love you

Little words have so much meaning
When you mean the words you say
Little words like glad to see you
How are you, hello good day
Little words like happy birthday
Happy anniversary
Little words like how I miss you
Words like hurry back to me

Little words like god be with you
In all you say and do
But I know I'll never find the words for you

Little werds have so much meaning
When you mean the words you say
Little words like it's a pleasure
To be here with you today
Little words called silly querells
And the sunshine turns to rain
But the words like sorry darling
Help you to give up again

There are words for all occasions
Words for all you say and do
But the greatest werds of all are
I love you

la, la, la...

There are words for all occasions
Words for all you say and do
But the greatest words of all are
I love you

Little words have so much meaning
When you mean the words you say
Little words like glad to see you
How are you hello good day

la, la, la...
