"People Sleep"

I spent my whole night
In the whole night
Wasting up and down

Water should be my savior after days like these

I need liquid
I need heat
I wash away the sad spirits
Drown my jaded judge
Time for thoughts of innocent oceans

I spent my whole night
I'm sick of waters out of Earth
I spent my whole night
Wasting up and down
Surrounded by the cement

Anticipating waves
Waves of pleasure
Waves of sadness
Waves of love and liberation
Waves of love and liberation

Where is the one who sleep (x7)
