(Hey!)

The way they look and move, the way they always
prove
To be on your mind but not on your side
There's no accident in a life that's spent
Watching time move on and on and on

And so you'll finally see, you're just a casualty (hey!)
Now you're coming around, yeah, you're coming
around and you found
That it's murder
Now you're slipping away more every day and they say
That it's murder

Don't be surprised when there is no prize
And the open doors won't close no more
And it wasn't your fault that their assault
Turned mystery into history

And so you'll finally see, you're just a casualty (hey!)
Now you're coming around, yeah, you're coming
around and you found
That it's murder
Now you're slipping away more every day and they say
That it's murder

Now you're coming around, yeah, you're coming
around and you found
That it's murder
Now you're slipping away more every day and they say
That it's murder

You've got the innocent, you've got the guilty
You've got the clean and the down right filthy
You've got the innocent, you've got the guilty
You've got the clean and the down right filthy

And so you'll finally see, you're just a casualty (hey!)
Now you're coming around, yeah, you're coming
around and you found

That it's murder
Now you're slipping away more every day and they say
That it's murder

Now you're coming around, yeah, you're coming
around and you found
That it's murder
Now you're slipping away more every day and they say
That it's murder

You've got the innocent, you've got the guilty
That it's murder
That it's murder

You've got the clean and the down right filthy
Now you're slipping away more every day

You've got the innocent, you've got the guilty
That it's murder
That it's murder

You've got the clean and the down right filthy
Now you're coming around and that's murder
